Professional Summary

AI & ML fresher with strong knowledge of Python, Machine Learning, and problem-solving. Skilled in developing projects such as news applications, and games using Python and APIs. Quick learner with a passion for building innovative AI-based solutions and improving technical skills. Seeking an opportunity to apply programming and analytical abilities in a growth-oriented organization.

Skills

Technical Skills: Python, C, Java, HTML, CSS, JavaScript, Pandas, NumPy, AI-Model, Scikit-learn, Flask, Machine Learning, Data Preprocessing, Model Training, MySQL, Git, GitHub, VS Code, Jupyter Notebook.

Non-Technical / Problem Solving Skills: Problem Solving, Debugging, Team Collaboration, Quick Learning, Analytical Thinking

Experience

C Programming Development | 2023 – 2025

- Developed console-based applications and problem-solving programs using C programming
- Implemented data structures, file handling, loops, functions, and pointers in practical projects.
- Strengthened logical thinking and debugging skills through coding practice and mini-project development.
- Gained understanding of memory management, algorithms, and structured programming concepts.

Machine Learning Projects | 2024 – Present

- Built Machine Learning models using Python libraries such as Pandas, NumPy, and Scikit-learn.
- Worked on data preprocessing, feature extraction, model training, and prediction tasks using CSV datasets.
- Developed projects including news classification and AI-based chatbot applications using APIs and ML concepts.
- Improved model accuracy and performance through testing, debugging, and parameter tuning.

Projects

Tetris Game using Python

- Developed an interactive Tetris game with real-time keyboard controls, score tracking, and block collision mechanics.
- Implemented game logic including grid management, row clearing, and random block generation using Python and Pygame.
- Improved problem-solving and debugging skills while optimizing gameplay performance and UI responsiveness.

Tech: Python, Pygame

GitHub: github.com/keval-piparotar/Tetris-Games

Fake News Detection Model

- Developed a Machine Learning model to classify news as real or fake using text datasets.
- Performed data preprocessing, text cleaning, feature extraction, and model training using Scikit-learn.
- Evaluated model accuracy and improved prediction performance through testing and optimization.

Tech: Python, Pandas, NumPy, Scikit-learn

GitHub: github.com/keval-piparotar/Truthlens

AI Chatbot using API

- Built an AI-powered chatbot capable of responding to user queries through API integration.
- Implemented speech/text input handling, automated responses, and browser automation features.
- Enhanced understanding of API handling, automation, and user interaction design

Tech: Python, APIs, Speech Recognition

GitHub: github.com/keval-piparotar/Auto-Reply-Ai-Chatbot

Education

B.Tech in Computer Science & Engineering

Parul University | Expected Graduation: 2027 | CGPA: 7.73

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Web Development

Certifications

- Hackathon Participation Certificate
- Participation in PHP Workshop
- NPTEL online certificate

Achievements

- Improved problem-solving and debugging skills by working on practical coding projects and algorithms.
- Participated in continuous learning of AI, Machine Learning, and Full-Stack Development technologies.
